

Channel list backup/upload/download via FTP for Ferguson Ariva S300

Downloading the .database from ftp server

1. Channel list backup

- connect a USB device to the receiver
- Go to Menu>Upgrade>USB Backup
- Choose Database Backup

- go to the right window and choose **Add New File**. When the new window appears, please name the file using the virtual keyboard.

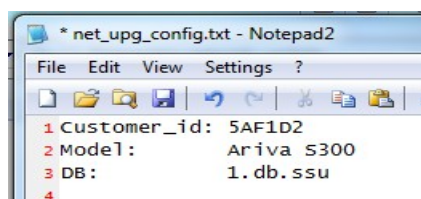

- save the file with **F1** RCU's button

2. Channel list uploading on FTP (supports only password protected accounts)

- Please upload the channel list .ssu file you want to share with others on your ftp
- Establish an additional .txt file and upload it on your FTP server

Name: net_upg_config.txt

File content:

Attention!!! 1 in 1.db.ssu is your channel list's name. If you have given an other name, please change it also in the .txt file.

3.Channel list download

- you can share you own channel list with other users
- go to Menu>Upgrade>Upgrade by Network
- choose by upgrade type **Upgrade Database**
- type in all the ftp settings (host, user, password) and confirm with **Apply**
